Dear Parents,

Greetings!!!!

Another amazing school year has started. However everyone should be very proud of the thousands of memories we created that can be cherished forever! Last year, our School celebrated its Annual Day - 'Aureole' with much vibrancy and life. Students not only presented their wonderful performances but also received honours for their curricular and co-curricular achievements. Most important our students have excelled in so many fields it is impossible to list them all.

Today, the role of a school is not only to pursue academic excellence but also to motivate and empower its students to be lifelong learners, critical thinkers, and productive members of an ever-changing global society. While academic excellence is our major thrust, the school is also devoted to prepare the students for life, groom them to face the challenges of tomorrow, and encourage them to be socially relevant. We constantly endeavor to always live up to this ideology and inculcate this into everything we do, with the aim that we will be able to ensure that the children grow to their full potential, while constantly being groomed to pass out as men and women competent to bear responsibility in all walks of life. The School's genuine concern ensures student's emotional growth along with intellectual excellence. This empowers them to develop their self-esteem, self-awareness and self-confidence.

The journey that is laced beautifully with triumphs would not have been possible without you all! The parents are the most strengthening power in moulding the future of children. Their consistent support empowers us to do more and more. I pay my gratitude to them for their faith in us.

It is rightly said that "A dream becomes a goal when action is taken towards its achievement" and we are committed in taking constructive and purposeful actions to produce optimistic, independent, compassionate, life-long learners and leaders who will bring glory to the School, State and the Nation.

BALANCE YOUR LIFE

Once a Professor stood before his class with some items on the table in front of him. When the class began wordlessly he picked up a very large and empty mayonnaise jar and proceeded to fill it with rocks, about 2 inches in diameter.

He then asked the students if the jar was full. They agreed that it was.

So the professor then picked up a box of pebbles and poured them into the jar. He shook the jar light. The pebbles, of course rolled into the open areas between the rocks.

He then asked the students again if the jar was full. They agreed it was. The professor picked up a box of sand and poured it into the jar of course the sand filled everything else.

He then asked once more if the jar was full. The students responded with a unanimous. "Yes."

"Now, said the professor," I want you to recognize that this jar represents your life. The rocks are the important things like your family, your partners, your health, and your children-things that if everything else was lost and they remained, your life would still be full.

The pebbles are the other things that matter-like your job, your house, your car.

The sand is everything else. The small stuff.

"If you put sand into the jar first, he continued" there is no room for the pebbles or the rocks. The same goes for your life.

If you spend all your time and energy on the small stuff, you will never have room for the things that are important to you .Pay attention to the things that are critical to your happiness. Play with your children. Take your partner out dancing. There will always be time to go to work, clean the house, give a dinner party and fix the disposal.

Take care of the rocks first the things that really matter. Set your priorities. The rest is just sand.
